Did you think
incontinence was just
a "woman's issue"?

Learn how physiotherapy can help men
with Pelvic Health, including incontinence
and pain after prostate surgery.

Incontinence can be dramatic following
prostate surgery or radiation
treatment. Men are alarmed by the
immediate decrease in their quality of
life that comes with being reliant on
urinary pads throughout the day.

Did you know?

The scientific research clearly shows that
men who receive physiotherapy BEFORE
and AFTER prostate surgery gain control
of their bladder quicker.
