

# Crossing guards are urgently needed

School crossing guards are urgently needed in both Georgetown and Acton.

"Crossing guards play an important role in ensuring the safety of children every day through our Town, but unfortunately we have a shortage at this time and are having difficulty attracting people to the role," said Dick Spear, Superintendent of Public Works for the Town of Halton Hills.

Crossing guards are required to escort school children across a roadway safely at designated school crossing locations in accordance with the Ontario Highway Traffic Act, the Occupational Health and Safety Act, and Town of Halton Hills guidelines.

- Responsibilities include:
- Obey all established traffic safety regulations to ensure pedestrians (going to and from school) are assisted in crossing roadways at designated locations
  - Report and document any incidents or accidents involving traffic and/or pedestrians

to the supervisor and appropriate police or school officials

The position requires the following qualifications:

- Community minded citizen of good character who is fit/alert, dependable and understands kids
- An acceptable Security Clearance Request certificate from Halton Police Services at applicant's expense
- Must be alert, able to maintain high degree of mental concentration, with visual and hearing ability to recognize traffic at a safe distance (approx. 300 feet)
- Must be able to perform duties outside in all diverse weather conditions

A complete list of qualifications can be found at: <http://www.haltonhills.ca/jobs/crossingguard.php>

The commitment is only two hours per day – two one hour shifts – and the position pays \$16.69/hour (per shift).

Are you changing your lifestyle because of incontinence?

Let us help you regain your confidence and independence

Many people believe that incontinence; the involuntary loss of urine, is a normal occurrence after childbirth or aging. Continence concerns are common but NOT normal.

Stress Incontinence (SI) refers to leakage that is noticed during a cough or sneeze, when laughing, or during strenuous activities like soccer, jumping jacks, or other aerobic activities. Sometimes women get the sudden and urgent need to get to a bathroom. Urge Incontinence (UI) is the loss of urine that is accompanied by this sudden, urgent feeling.

Leakage may have started off with minimal and tolerable amounts of leakage that occurred with a cough or sneeze, but then leakage can accelerate to amounts that are substantial enough to wear protective padding, continence garments or simply just avoiding activities that were once enjoyed.

**ERAMOS A PHYSIOTHERAPY**

Did you know? The scientific research clearly shows that physiotherapy should be the first line of treatment for incontinence.
