

Firefighters rescue cat from bulkhead

Halton Hills firefighters were called to a home undergoing renovations on Gardiner Dr. earlier this month because a cat had managed to crawl down a joist space and into a bulkhead.

The joist space was exposed because the floor had been re-

moved from a second floor washroom.

Firefighters used their ther-

mal imaging camera on the first floor to locate the cat, then the ceiling was removed to rescue it.

... Lend Me Your Ears

GETTING USED TO NEW HEARING INSTRUMENTS

Part 1

A patient who has never worn hearing instruments before, or is wearing a new type or circuit may go through a period of adjustment. The following are suggestions to help you through that adjustment period:

Don't get discouraged. It may take time to realize the benefit of your hearing instruments. You have been hearing through a damaged system that has delivered distorted signals to your brain. Now the sounds you are being exposed to are louder and different than what you are used to. In time, your brain will adjust to the new signals it is receiving.

When you first start wearing the hearing instruments, you will suddenly hear sounds you were previously unaware of. Many you will recognize as sounds you used to hear before you had a hearing loss, and others will have to be identified for you. These sounds will seem bothersome at first because you are not used to hearing them. In time, like those with normal hearing, you will unconsciously block out these daily sounds.
