### COMMON QUESTIONS ABOUT TINNITUS - PART 1 WHAT IS IT?

Tinnitus is a subjective experience where one hears a sound, ringing or noise when no external physical sound is present. Some call it "head noises", "ear ringing," or other similar things.

WHAT CAUSES IT?  
There are many causes; indeed almost everything that can go wrong with the ear has Tinnitus associated with it as a symptom. Things as simple as wax against the eardrum to very serious items such as tumors on the 7th facial nerve can produce Tinnitus. Meniere's disease has Tinnitus associated with it. One of the most common causes of Tinnitus is exposure to excessively loud sounds such as shooting, chain saws, rock concerts, or other loud noises.
