How healthy is your shoulder?

Are you living in pain or discomfort?

ERAMOSA
E-A
PHYSIOTHERAPY

While there are many causes of shoulder pain, be it a sports injury, trauma or joint weakness, it is important to have an accurate diagnosis so that the appropriate treatment is implemented.

Common medical diagnoses for shoulder pain include: rotator cuff tendonitis, rotator cuff tear, impingement syndrome, frozen shoulder, shoulder dislocations and shoulder separations.

Did you know?

Shoulder pain is one of the most common complaints treated at Eramosa Physiotherapy Associates through our Path to Improved Health.

NEWS

Catholic school board seeks public input on school closure policy

The Halton Catholic District School Board is gathering public feedback on two amended policies related to school accommodation planning and partnerships: Policy I-09 School Accommodation Review—Consolidation/Closure and Policy I-37 Community Planning and Facility Partnerships.

“We are reaching out to parents and members of the community to solicit feedback and to share planning related information,” says Frederick Thibeault, Administrator, Planning Services at the Halton Catholic District School Board. “This process will help to sup-

port school board operational efficiencies, as we focus on student well-being, and academic achievement.”

Parents and members of the community are encouraged to review and send their feedback for Policy I-09 and I-37 by Wednesday, Oct. 7, at 5 p.m. It is recommended that the draft policies, Ministry of Education guidelines, and supporting documentation be reviewed, prior to completing the feedback form. For more information and to provide feedback on Policy I-09 and I-37, visit the Accommodation Review & Partnerships page.

THERMOGRAPHY
CLINIC INC.
of Halton Region

THERMOGRAPHY
VS.
MAMMOGRAPHY

90 days	2 cells	 Breast lymphoma (breast cancer) visible at 2 years (256 cells). Redness indicates increased circulation (hot area).
1 year	16 cells	
2 years	256 cells (detectable by Thermogram)	
3 years	4,896 cells	
4 years	65,536 cells	
5 years	1,048,576 cells (still undetectable by mammography)	
6 years	16,777,216 cells	
7 years	268,435,456 cells	
8 years	4,294,967,296 cells (doubled 32 times; normally detectable by mammography at this stage!!!)	
10 years	40 doublings at this point and is considered lethal	

Thermography is a functional test which uses infra-red sensors and measures heat/inflammation. NO compression, NO radiation, NON invasive.

Certified Cancer Exercise Specialist
Certified Breast Cancer Recovery Specialist
Registered/Insured Yoga Instructor

The thought of exercising after a cancer diagnosis can seem daunting. There are so many physical and emotional side effects of the diagnosis, surgery and treatments. You may feel tired, achy and emotionally drained.

The role of exercise in cancer recovery is not to increase fitness level, but quality of life. As a Cancer Exercise & Breast Cancer Recovery Specialist; with extensive knowledge of treatments and surgeries, specific to 25 types of cancer, Lymphedema Identification, Prevention & Management; I provide you with the knowledge and expertise to safely exercise during cancer

treatment as well as post cancer rehabilitation.

I work with you to create an exercise program structured with your individual situation and needs in mind.
