

Georgetown man shares \$1 million Lotto 6/49 win

A Georgetown man is part of a group of three friends from the Greater Toronto Area who are celebrating after winning the guaranteed \$1 million prize from the October 31, 2015 LOTTO 6/49 draw.

"We worked together and bought lottery tickets as a group for nine years," said group spokesperson Russell Foster of Georgetown while he, Jayaraman (Jay) Sivaraman of Mississauga and Vince

Mazzucco of Toronto were at the OLG Prize Centre in Toronto where they picked up their winnings.

The men don't work together any longer but their tradition of buying lottery tickets as a group continues.

"It's our first time winning big and we are thrilled," said Sivaraman.

All three men have plans for their windfall— from small pur-

chases, to paying off debt to tucking some money away as savings.

LOTTO 6/49 includes a Guaranteed \$1 Million Prize Draw along with each and every regular draw. There have been 253 guaranteed \$1 million prize draws to date. One hundred and eight winning tickets have been sold in Ontario.

This winning ticket was purchased at Petro Canada on South Kingsway in Toronto.

BIG WIN:

Jayaraman (Jay) Sivaraman of Mississauga, Vince Mazzucco of Toronto and Russell Foster of Georgetown are sharing a \$1 million Lotto 6/49 lottery win.

Community input encouraged on new large fill policy

Conservation Halton is seeking feedback from the community on its draft Large Fill Policies and Procedural Guidelines.

Comments are requested by Dec. 1, 2015 from all interested parties and groups in the Conservation Halton watershed.

You can find the draft Large Fill Policies and Procedural Guidelines on Conservation Halton's website, www.conservationhalton.ca/large-fill-policy.

The Large Fill Policies and Pro-

cedural Guidelines are intended to address the issue of the placement of large fill within the Conservation Halton watershed.

This is an ever-increasing concern among municipalities, conservation authorities and people living in rural areas, in Conservation Halton's watershed and generally within the Greater Golden Horseshoe. Conservation Halton staff were directed by its Board of Directors to draft a large fill policy. Of

particular concern are instances of illegal dumping of fill in regulated areas (under Ontario Regulation 162/06) and applications for large quantities of fill for placement on properties, which are increasing.

Comments may be submitted by December 1, 2015 to:

Barbara J. Veale

Manager, Planning and Regulation Services, Conservation Halton
2596 Britannia Rd. West, Burlington, ON L7P 0G3

Telephone: 905-336-1158 ext. 2273, Fax: 905-336-6684

Conservation Halton administers Ontario Regulation 162/06, (Development, Interference with Wetlands and Alteration to Shorelines and Watercourses Regulation). This regulation applies to river or stream valleys, wetlands and adjacent lands, shorelines and other hazardous lands and is intended to protect people and property, as well as the natural en-

vironment, from natural hazards. Permission is required from Conservation Halton to:

- develop in or adjacent to a regulated area;
- alter a creek, stream or watercourse; or
- interfere with a wetland.

A final version of the Large Fill Policies and Procedural Guidelines will be presented to the Conservation Halton Board of Directors for approval in February, 2016.

Secure your smile with dental implants

Do you have missing teeth or dentures that need replacement?

Through the latest in implant technology our team offers you:

- dental implants
