## “Why do I hear but not understand?”

### FREE trial offer ends September 28<sup>th</sup> 2018

If you struggle to understand, you're not alone, in fact 47% of Canadians over the age of 60 have hearing loss.<sup>1</sup> Your hearing difficulties could be caused by damaged hearing hair cells inside your inner ear (cochlea). When damage occurs in the high-frequency areas of the cochlea (where consonants are heard), speech may sound garbled and comprehension could become difficult. The right hearing aid could help you improve your comprehension.

Hear the difference hearing aids can make. Try the latest advanced or premium digital hearing aids for 14 days, risk-free. Our hearing experts will perform a FREE hearing assessment and fit you with hearing aids suited to your loss. There's no cost or obligation to participate.
