**HALTON RESIDENT CONTRACTS WEST NILE VIRUS**

ALEXANDRA HECK  
aheck@metroland.com

Halton Region Public Health is warning residents after someone has tested positive for West Nile virus.

This is the first confirmed human case in the year, however mosquitoes tested around the region in Oakville, Milton and Burlington have tested positive for the virus in the past months.

"The Halton Region Health Department works diligently to reduce the risk of West Nile virus in our community through education and preventive programs such as larviciding," said Dr. Hamidah Meghani, medical officer of health for the Halton Region.

"While 80 per cent of people infected with West Nile virus experience no

Two horses in Dunnville have tested positive for eastern equine encephalitis virus, which is transmitted through the bite of an infected mosquito.

symptoms, others will have West Nile fever."

These symptoms also include headaches, muscle aches and rashes.

Halton Region Public Health urges residents to take precautions to avoid getting bitten by wearing repellents with DEET or Icaridin, getting rid of standing water, and wearing long sleeved pants and

shirts in areas with mosquitoes.

The region continues to monitor areas with standing water around Halton in order to eliminate potential breeding sites.

If residents see water standing for more than a week outside, in tires, bird baths or other capacities they can report it to [access-halton@halton.ca](mailto:access-halton@halton.ca).
