

# Eyes Focused on You

*Dr. Caroline Teske & Associates - Optometrists*

**Did you know???** Our eyes provide us with an image, but it is our brain that gives us vision.... and now we know we can train the brain! That is **Focus Vision Therapy!**

**Have you suffered from concussion? Do you have a child with a learning disability or difficulty focussing? Have you suffered from a stroke that has affected your vision?**

Vision Therapy can be used to correct or improve a number of **vision challenges** OR to enhance normal vision such as **sport performance**. This new practice enhances our scope of care and demonstrates our commitment to patient wellness and our

holistic approach to the treatment of eyes, mind and body in an integrative health care model.

The body is connected and the eyes are an extension of the brain! That is how **Vision Therapy makes a difference**.

If you would like to find out more about Vision Therapy and how it may help you or a member of your family please give us a call.

**905.702.1616**

*We set the standard for quality eye care and we focus on your overall health and wellness.*
