COMMON QUESTIONS ABOUT TINNITUS - PART 2 DO WE KNOW WHAT TINNITUS IS??

The actual cause or event or mechanism of Tinnitus is not known. We know it is real; it is a symptom that something is wrong in the auditory system, but we do not know what that something is. We do know that it is not the patient's imagination; it is a physiological or neurological event. There is reason to be hopeful because current research using a Tinnitus model may provide the necessary information for identifying its cause.

IS IT ASSOCIATED WITH HEARING LOSS?

In most cases, Tinnitus is associated with some hearing loss. For example, those who have been exposed to excessively loud sounds may have a hearing loss for the high pitched tones. Usually their Tinnitus will be located as a high pitched tone in the region of the hearing loss. In some cases Tinnitus is present where there is no hearing loss and for no discernable reason. Green River Revival (from left) Lorne Scriver, Brian Jennings, Joe Brett and Jeff Roberts, will bring the music of Creedence Clearwater Revival to the John Elliott Theatre in Georgetown Saturday, March 2.

"Green River Revival has toured all over the globe, and their world-class experience is demonstrated in every jaw-dropping performance," said show producer Bill Culp.

Green River Revival presents the music of CCR with a histor-

ical storyline that incorporates several costume changes, including the chain gang prison uniforms right out of the song Midnight Special, those plaid flannel shirts made famous by CCR in the 60s, and of course, army fatigues depicting the era of

John Fogerty's Vietnam protest songs.

Tickets are \$45, tax included, and are available at the theatre box office at 9 Church St. in Georgetown, online at www.HaltonHills.ca/Theatre, or by calling 905-877-3700.
