Q: What are zoning by-laws and how do they affect my property?

A: The town is divided into different types of zones. Each zone has rules that stipulate the type of building allowed on the property and how it may be used. These by-laws also specify where buildings and other structures may be located, as well as lot size allowed, acceptable dimensions for both structures and lots, parking requirements, building and fence heights and setbacks from the street.

It is important to know the setback dimensions in your area if you are building a new house but also if you plan to add any structures to your existing home. There may be setback rules for porches, decks, garages, and other structures you may be adding to your property.

In order to determine how the zoning by-laws affect your property you can contact the Town or go online and check on their website. As an Ontario Land Surveyor, I can help you determine how the zoning by-laws affect your project and provide surveying information about your property to make sure your project meets all applicable regulations.

Q: Does Acupuncture Hurt?

A: This is the most frequently asked question I receive regarding Acupuncture. Fear of pain from acupuncture needles is one of the most common reasons people forgo acupuncture treatment.

Often to the astonishment of those who take the plunge, acupuncture does not hurt. Acupuncture needles are extremely fine and thin. When provided by a skilled and experienced Acupuncturist, insertion of the tiny needle will cause minimal to no pain or discomfort. Please note that Acupuncture needles are sterile, single-use, and made of high-grade surgical stainless steel.

Once the needles are in place and no discomfort is felt, most patients find the treatment relaxing and enjoyable as pain is relieved and a natural release of endorphins occur. Acupuncture when provided by a Practitioner of Traditional Chinese Medicine is an effective tool for muscle and joint pain, digestive issues, mood disorders, immune problems, and stress disorders. Acupuncture and TCM can also assist with boosting fertility, relieving pregnancy issues, and supporting hormonal disorders.

For further info regarding Acupuncture and TCM, please check out my website at www.carolyndew.ca
