

NOTICE OF PUBLIC INFORMATION CENTRE #1

Eighth Line Municipal Class Environmental Assessment Study

The Study

The Town of Halton Hills is undertaking a Schedule C Municipal Class Environmental Assessment (Class EA) for improvements to Eighth Line from Steeles Avenue to Maple Avenue (see map). The need for improvements to Eighth Line has been identified due to increased population and greater demand on the Town's road network.

The Class EA study will evaluate traffic capacity, travel demand management measures, safety issues, natural environment impacts, land use implications, transit and active transportation considerations. To address transportation capacity needs in the study area, alternatives are being examined including the impacts of alternatives on the social, cultural and natural environment.

The Process

The Study is being carried out in accordance with the planning and design process for Schedule C projects as outlined in the Municipal Class Environmental Assessment (October 2000, as amended in 2007, 2011 and 2015), which is approved under the Ontario Environmental Assessment Act.

Upon completion of the study, an Environmental Study Report (ESR) will be prepared and made available for public review and comment.

Opportunity to Participate

Consultation is an important part of this study. The Town of Halton Hills would like to ensure that anyone interested has the opportunity to provide input on planning and design of the project. The public is invited to attend and provide input at the first Public Information Centre (PIC) that will present the problem /opportunity statement, results of environmental and technical studies completed to date, the alternative solutions considered and a preliminary preferred solution.
