WILL THE COVID-19 VACCINE BE MANDATORY IN SCHOOLS?

ROLAND CILLIERS
rcilliers@metroland.com

VACCINATIONS FOR ALL STUDENTS AND STAFF?

Cases are on the rise. Dr. Hamidah Meghani, commissioner and medical officer of health for Halton Region, provided a pandemic update to the Halton Catholic District School Board on Nov.3. The presentation came a day after the region had experienced an all-time high in COVID-19 cases, which have been steadily rising since the fall.

Operating schools have proven to be a challenge during the pandemic with 69 schools across the region seeing at least one confirmed case of the virus at some point. Here are three highlights from the presentation:

1. WOULD YOU SUPPORT MANDATORY COVID-19

"Without knowing the certain features of a future vaccine, such as its effectiveness and duration of protection, it's difficult to make a decision of whether it should be mandatory or not. There's a lot of thought process that goes into whether something should become mandatory at a provincial level," said Meghani.

2. HOW LIKELY IS IT THAT STUDENTS WILL BE SPREADING THE VIRUS TO EACH OTHER AT SCHOOL?

"The evidence related to the spread between children and from children to adults is still emerging, but what is agreed upon is the risk of transmission appears low when infection control

measures are in place. These reports also note within clusters and outbreaks, adult transmission seems to be more common than child-to-adult or adult-to-child transmission," said Meghani.

3. WHAT'S THE BEST WAY TO PREVENT THE SPREAD OF THE VIRUS IN SCHOOLS?

"I cannot stress enough the importance of the key public health measures, which include staying home when ill, practising physical distancing as much as possible, wearing a mask and cohorting — that is students should limit their contact with only their classmates and a single teacher for as much of the school day as possible," said Meghani.
