Q: How old would you say children should be for their first dental exam? Five or Six? In years past, it was rare for a child to see a dentist before five or six years old. Would most dentists agree that is too long to wait?

A: Today, most dentists recommend the first dental exam to be scheduled around the age of two. Because not all the teeth are present, this visit is mostly a consultation. Parents can ask questions about their child's teeth. The dentist can also show how to best clean the infant's teeth and advise the parents on the best dietary habits for their child's optimum development. This visit also helps the child to realize the dental office isn't something to be afraid of. As the child gets older, it is important that the parents not discuss their own negative experiences with dentists. Questions should be answered truthfully and with a positive attitude. Modern day dentistry is much better than when we were children. Keeping your children's teeth healthy begins with timely visits to your dentist.
