... Lend Me Your Ears

TWO MORE REASONS TO QUIT!

Exposure to cigarette smoke may hasten hearing loss as you grow older. Monitoring more than 3,500 people between the ages 48 and 92 for 3 years, University of Wisconsin Medical School researchers found that smokers were almost twice as likely as non-smokers to have trouble hearing. Some scientists think cigarette smoke has a toxic effect on inner-ear cells, while others believe it may constrict blood flow to the inner ear. For more information on preserving your hearing please call...

GETTING THEIR MESSAGE OUT

Opponents to the proposed Highway 413, including members of the Halton Hills Climate Action group, protest along the side of Winston Churchill Blvd. between Steeles and No. 5 Sideroad, on October 1.
