Fire Department briefs

Halton Hills firefighters had a quiet weekend responding to nothing more serious than a pair of false alarms. Both alarms occurred at a Durham St., Georgetown seniors' residence. In both cases — the first at about 2:30 p.m., the next at approximately 8:10 p.m. — a faulty detector was found to be the cause.

Use caution when using electric lawn mower

If you are using an electric lawn mower, the Halton Hills Fire Department advises you to be sure that it is certified and approved by a nationally recognized testing agency, and that it is double-insulated or grounded. Wait for a dry day before cutting lawns as water might mean a nasty shock for you. Store under cover in a dry place. Cords can be made unsafe by both rain and sun. Water may cause a short, and heat and ultra-violet rays from the sun cause deterioration of insulation.

All power garden tools should be stored in a dry place. Don't carry an appliance by the cord, and never

yank the cord when removing it from a receptacle; grasp the plug, not the wire. Keep the cord away from sharp edges, water, oil and heat.

— keep your appliances sharp and clean for best and safest performance and follow manufacturers' directions for servicing the appliance.

— keep children a safe distance away from your work area.

For more information contact the Halton Hills Fire Department, Fire Prevention Division, at 873-2600, Ext. 207. We will glad to assist in any way possible.
