Fabric Care TIPS

~ Fourteenth of a Series ~

TAKE CARE

When was the last time a cleaning process damaged a favorite shirt, suit, or dress? Although the care label instructions were followed, the garment did not respond well to the manufacturer's recommended cleaning method. Luckily, there are steps that can be taken to avoid disasters during the cleaning process.

What Are Care Labels?

Care labels, the permanent label or tag that contains regular care information and instructions attached inside a garment, give the proper cleaning method for the garment. A garment cleaned by the method prescribed on a care label is expected to

undergo the process with no problems.

Besides giving full instructions for at least one satisfactory method of care, a care label should warn about any part of the procedure that could harm the garment or others being laundered or cleaned at the same time.

Follow Care Label Instructions

To insure the best cleaning performance, always read and follow the care instructions. Use of a care method not specified on a care label may be risky. For further information about care labels, please contact Barragers Cleaners.
