**Steamatic of
Halton**

They do more than clean carpets
You may think that Steamatic is only a carpet cleaning business, but they do much more than clean carpets.

Not only can they get your carpets and drapes really deep down clean with their patented steam cleaning process, the professionals at Steamatic also have a special air-duct cleaning process that reduces air contaminants, musty odors and house dust in your home.

Central heating and cooling systems in homes and businesses provide the ideal environment for mold, mildew, fungus and bacteria to grow.

Dust mites also cling to dust particles. These undesirables are often responsible for causing unpleasant musty odors and aggravate many allergy problems.

Steamatic air duct cleaning process gets rid of musty odors and reduces air contaminants by up to 85 per cent. Also, a clean air-circulation system improves air flow up to 30 percent and increases the central unit's heating and cooling efficiency by up to six degrees.

Steamatic also offers help with fire and water damage should you ever need these services.

Whatever cleaning services you may require, Steamatic has earned a reputation for excellence and always puts customer satisfaction first.

The staff has had extensive training in the patented carpet cleaning and duct cleaning process, as well as fire and water damage cleaning services. They will even take care of cleaning your drapes on the rod.

Steamatic of Halton has been serving Brampton, Georgetown, Acton and Milton customers for the last 5 years and can be reached at 877-2320.
