LEARNING TO LIVE WITH DENTURES

Learning to live with dentures often requires a period of adjustment. This time can be shortened if the patient adopts a good mental attitude and is patient and determined to wear his or her dentures. It doesn't matter how much difficulty one experiences at first, as you will gradually learn to master them. Some people learn almost immediately to use false teeth, while others have more difficulty. A few denture wearers do not assume the right mental attitude, and without giving their new teeth a fair trial, begin to think their case is hopeless. These few people will never learn to wear dentures unless they make up their minds to conquer their difficulty. Remember, it takes about four times longer to master a lower denture than an upper denture.

Also, it is important to remember that it isn't always the person with the smallest quantity of gums or ridges that is the hardest to fit, and who apparently would have the most problems. These people usually realize that their case is more difficult, and knowing this, are prepared for anything. When they get their dentures, they will find that denture wearing isn't as bad as they feared. Many people have accepted the challenge of wearing dentures, and won. You can too! Don't hesitate to call our office for any information you might need regarding your dentures.
