**NEW!
LAVEDENT DENTURE
CLEANSER**

Cleansing with "LAVEDENT"

As LAVEDENT concentrate is added to water, special agents within the cleaner automatically adjust water hardness and soften the water being used. As soon as enough concentrate has been added (1 to 2 capfuls per 8 ozs. of water), the solution is active. As the denture is immersed, the solution immediately begins to dissolve plaque (tartar), and removes debris and odor. Other special agents allow LAVEDENT to penetrate and clean even the smallest cracks and crevices. While LAVEDENT works within the pH range necessary to remove plaque, it is not a strong oxidant or bleach and, therefore, can safely be used on any dentures with soft linings or metal attachments.

LAVEDENT has so many distinct advantages over other denture cleansers. Its regular use makes sense because you will always be assured of having a completely clean, odor-free, fresh denture. LAVEDENT is not available in stores, but it can be purchased at our office.
