~ SATISFACTION GUARANTEED ~

Zibie Haitner and his wife welcome the opportunity to look after your cleaning needs.

Steamatic of Halton has new owner

Zibie Haitner, is the new owner of the Steamatic Franchise in the Halton Hills Area. Mr. Haitner started working for the franchise 4 years ago as a cleaning technician. Last year he worked for the Steamatic Headquarters Store as a decontamination expert. Beside carpet, upholstery and air duct cleaning further knowledge was gained about fire and water damage restoration and corrosion control.

damage can occur when least expected. The company is capable of restoring most items in your home quickly.

It's Automatic With Steamatic!

Steamatic of Halton has a new address and phone number and Zibie would like to pass it on to all valued customers of Steamatic of Halton Peel:

STEAMATIC OF HALTON
100 ELGIN STREET, BOX #12,
ACTON, ONTARIO L7J 2W1
PHONE # 416-877-2320

Zibie would like to thank you for your past patronage and would sincerely appreciate the opportunity to service your future needs.

Steamatic would be more than happy to help maintain your homes' carpet, furniture, and Air Duct System. We are also able to help in Emergency Situations. Water damage and Fire

ENERGY SAVINGS BY DESIGN

Planting a tree, shrub or vine can provide benefits greatly outweighing the cost. Well-planned landscaping can not only provide energy savings, but also can increase the beauty and value of your home.

Planting trees that lose their leaves on the southern and western sides of your home provides summer shading to cool your home, lowering summer cooling costs. In winter these same trees will allow the sun to shine in to provide natural light and warmth into your home.

Planting evergreen shrubs and trees on the northern and western sides of your home creates a natural winter windbreak, cutting winter heating costs.

Shading your air conditioning unit not only saves energy, but helps lengthen the life of the unit. The shade provided by a tree or

shrub eases the strain on an air conditioner unit. Just be sure not to block the air circulation necessary to run the machine efficiently.

Vines are another quick and beautiful energy saver. Deciduous vines provide quick-growing shade on the walls of your home. Consult a professional landscaper to help you choose the right vine.

Studies show landscaping can also improve the resale value of your home and reduce noise pollution.

Remember, before beginning a landscaping project, call us to find out if there are underground lines you need to avoid. Also, don't plant tall growing trees under power lines.

For energy savings, beauty and noise reduction, nothing beats landscaping.

3. LANDSCAPE WITH CARE

- Call before you dig. Your utility can tell you the location of any underground lines.
- Don't plant tall-growing trees under power lines. If you have a tree with power lines running through it, don't climb it or build anything in it. Call if the tree needs trimming.
- Keep bushy shrubs away from your meter.

ENERGY HINTS

Get the Brightest Lights

Dust Your Lights! Dust free bulbs and fixtures are more efficient - even a thin layer of dust lowers lighting levels.

Switch to fluorescents! Compared to a 40 watt incandescent bulb, a 40 watt fluorescent tube will produce about six times more light at the same cost and last 16 times longer.

One 100 is better than two 60's! Use a single high wattage bulb instead of two or more low wattage bulbs wherever possible. A single 100 watt bulb will give the same amount of light as two 60's but use up to 15% less energy.
