

IWA planning GTA workshop

At its public consultation workshop scheduled for May 29, the Interim Waste Authority Ltd. (IWA) will provide participants with feedback on how, after having received public and government agency comments, it proposes to revise the Step 6 criteria being used to select three new landfill sites for the Greater Toronto Area.

The workshop will be held at Humberview Secondary School, 135 Kingsview Drive, Bolton.

In addition to Step 6 selection criteria, the IWA will discuss:

- preliminary alternative travel routes being considered for garbage disposal vehicles to and from the potential landfill sites;
- preliminary plans for the landfill site design and measures to minimize the impact of landfill operation on the surrounding community; and
- preliminary indications of areas to be studied (referred to as impact zones).

This information has been prepared for each of the five sites included on Peel's "short" list of potential landfill locations and is being used to compare possible environmental impacts of each site with the others. Maps and diagrams will be displayed for public viewing and comment at the workshop.

The workshop begins with an open house from 10 a.m. until noon during which time participants may view the display materials and ask questions of the IWA representatives. Presentations and discussions begin at 1 p.m. Participants may attend the open house, the presentation or both.

"The IWA is making a special effort to encourage people to attend these sessions. The information we will be presenting is important not

only to the people who live close to candidate landfill sites, but also to those who live along potential travel routes for disposal vehicles. "We hope people will come to these workshops to share their views of these preliminary plans," said Walter Pitman, chairman of the IWA board of directors.

Since the short list of sites was announced last November, the IWA has held two other workshops in

Peel dealing with compensation and impact management and Step 6 criteria. In addition, the IWA recently accepted oral and written briefs from members of the public and municipalities on issues related to the landfill search process.

The IWA requests that people who want to attend this workshop register in advance by telephoning the information office at 1-800-361-5448.

OPEN HOUSE

NEW!
LAVEDENT DENTURE CLEANSER
 Cleansing with "LAVEDENT"

As LAVEDENT concentrate is added to water, special agents within the cleaner automatically adjust water hardness and soften the water being used. As soon as enough concentrate has been added (1 to 2 capfuls per 8 ozs. of water), the solution is active. As the denture is immersed, the solution immediately begins to dissolve plaque (tartar), and removes debris and odor. Other special agents allow LAVEDENT to penetrate and clean even the smallest cracks and crevices. While LAVEDENT works within the pH range necessary to remove plaque, it is not a strong oxidant or bleach and, therefore, can safely be used on any dentures with soft linings or metal attachments.

LAVEDENT has so many distinct advantages over other denture cleansers. Its regular use makes sense because you will always be assured of having a completely clean, odor-free, fresh denture.

LAVEDENT is not available in stores, but it can be purchased at our office.
