

Young cyclists program

By Oksana Buhel

Halton Regional Police Services Acton Village Constable Bill Riddle has initiated a program to promote safety in bicycling for children under 14 years-of-

age. Cyclists seen abiding by the rules of traffic will be given coupons for cold drinks from Mr. Mugs Coffee and Donuts, on Main St. in Acton, and for games of miniature golf from Tuitman's Garden Centre and Landscaping, on Hwy. 25, just south of Acton.

"It's a positive reinforcement of the law," explained Riddle. "I figure this is a good way of getting the idea across."

Those who need further incentive to abide by bicycle safety rules can keep in mind the \$53.75 fine for riding on the sidewalk, \$53.75 fine for doubling, and a \$90 fine for not stopping at a stop sign.

Asked if the new program had a name, Riddle chuckled, "Oh, I haven't thought of anything catchy yet."

Immunization program stressed in Halton

Adequate immunization is required for entry into Halton's daycare centres, nursery schools and elementary and secondary schools. The immunization requirements vary with the age of the child and the setting.

Injectable polio vaccine was reintroduced in April, 1993. As supplies of the oral vaccine are depleted, children will be given the vaccine by injection. The polio vaccine is combined with the diphtheria, pertussis (whooping cough) and tetanus vaccines. This combined vaccine is known as DPTP.

The oral vaccine was introduced in 1990 because of supply and production problems with the injectable vaccine. New methods of production have resulted in an enhanced injectable vaccine that is now available in sufficient quantities to meet the needs of the provincially-funded vaccine program.

DPTP is given at ages 2, 4 and 6 months and again when the child is between ages 4 and 6 years. Protection against polio is completed with the combined diphtheria, tetanus and polio vaccine (DTP) given between the ages of 14 and 16 years. As adults, polio vaccine would be required only when traveling to parts of the world where polio is common.

For more information about polio and other vaccines, call the Halton Regional health Department, 825-6060 and ask for the Communicable Diseases Program.
