### Industrial Income Fund

1 year	3 year	5 year	10 year	since inception
15.0%	15.2%	10.2%	13.0%	10.9%

The story: pre-tax results for Industrial Income Fund have outpaced GICs by a big margin. Better still, after allowing for Revenue Canada, the difference gets even bigger.

The reason: the skilled money management of Mackenzie, coupled with lower income tax payable on the dividends and capital gains which form part of the fund's quarterly distribution.

The lesson: for the full story on better returns - before and after tax - from a portfolio more than 75% invested in securities which are fully guaranteed for principal and interest payment by the federal government, you should speak with your independent financial advisor. Today.

Important information about this offering is contained in the Fund's simplified prospectus. Obtain a copy from us and read it carefully before investing. Unlike GICs, unit value and investment return for mutual funds will fluctuate. The indicated rates of return to September 30/93 are the historical annual compounded total returns, including changes in unit value and reinvestment of all distributions, and do not take into account sales, redemption, or optional charges payable by an investor which would have reduced returns. Past performance is not necessarily indicative of future returns.
