Ultimate Pure Water is purified on-site by "Reverse Osmosis". This purification process acts on water to remove virtually all sediments, metals, minerals, and chemicals. The ultra-violet purifier in the dispenser eliminates the risk of bacteria and viruses. This water is so pure that the pharmaceutical industry now uses reverse osmosis treated water instead of distilled water for the manufacture of medicines.

Experience pure refreshment and more...

At last, great tasting water that will give a new fresher flavor to your coffee, tea and juices. Ice cubes will be clearer and harder for greatly improved cold beverages. Other favorite uses that reveal the rewarding difference that pure water makes are: baby formulas, cooking, weight loss diets, house plants, aquariums, steam irons, humidifiers, photography and batteries.
