

# All right you own a neat car!

So how does it sound? If the hottest thing about your interior is the heater, then add some I.C.E. Pioneer picked the parts to perk the performance permanently. Right! Detachable face - of course. AM/FM CD controller - of course. High Current 320 watt power block - for sure! And front end support is crystal clear. With 6X9's happening from inner rear. And hang on, 'cause the 10" subwoofer makes mean! Save the hassle, these choices are made - This you gotta do!
