

# Change Dad's mind without skipping a beat.

Panasonic's SC-CH80 and SC-CH60 3-CD mini systems let you make out the lineup. You think it over, check the mood; even if it's only your own, and get ready to spin. Nice piece. You're deep into it when you suddenly realize, the next CD up just doesn't have the same rhythm. Not only is it going to change your mood, it's going to run your space. So, change the next CD. Or both of them, if you want to. Both systems allow you to change any two discs, while the third one keeps playing.

It's your orchestra. And your move, maestro.

The SC-CH80 includes 3-Disc Rotary CD Changer with MASH 1-bit D/A conversion and digital servo system.

SC-CH80

And, not only can you change discs, it includes a Feather-Touch Auto Reverse Cassette Deck which can be operated by remote control. This Double Cassette Deck also includes High-Speed Editing. And a Sound Field Processor with 5-Preset EQ Patterns. And can even edit CD to Tape.

And, just like your music, you can set up your mini system anyway you want it. There's a two-piece centre unit with the CD changer and tuner in one piece and the cassette deck and amp in another. Hey, maybe you want to move the party.

Now, suppose you want to fiddle with the band(s). The SC-CH60 also offers 3-CD Changer - Play One Disc, Change Two. Dynamic Stereo Sound with Solid Power Amp 20W/CH and Double Cassette Deck with High Speed Editing.
