Check those windows too

If your plans for spring cleaning include washing windows, you may want to take it one step farther this year.

This winter's extreme temperatures may have caused the glass to crack, particularly in the lower corners. Besides being unsightly, cracks reduce the energy efficiency of the window. A reputable glass dealer can help with the replacement of cracked panes. Peeling paint inside or outside the window indicates moisture around the window. Leaving the wood beneath the paint unprotected will lead to warping of the frame.
