## PROTRAK ELECTRONICS

KEVIN HAZZARD  
☎ 519-853-5242

THE MOST COMMONLY ASKED QUESTIONS ABOUT CLEANING YOUR VCR

*How does PROTRAK ELECTRONICS clean my VCR? For only \$29.95!*

First, after removing the covers, we do a thorough visual inspection to ensure there are no obstructions inside (toy cars, coins, etc.). Next it's tested & any symptoms are noted. These can range from poor picture quality to abnormal mechanical sounds. We then clean the heads (video, audio and control) using a special cleaning fluid and chamois swab. Then the entire tape path is cleaned. Glazed belts are treated to a special revitalizer and springs are tested for adequate tension. Contact switches are cleaned to assure proper function and the clutch is tested for proper adhesion. Now a basic function test is performed again and if all goes well it goes on the analyzer. This step electronically checks all the critical specs and gives a pass/fail indication and exact numerical readout for tape speed and wow & flutter (variations), head speed and jitter and servos locked (timing). This ensures that the machine meets factory specs like the day it came out of the box. Finally, the covers are replaced and the outside surfaces are cleaned.

*What happens if a problem is detected during the routine inspection?*

If the VCR is found to be needing parts during this procedure, then you (our valued customer) will be informed and a free and guaranteed estimate will be provided before anything is done. The cleaning will be completed if you choose to have the repair done or not. No questions asked!

*So then I have to pay for the cleaning and the repair? That can really add up!*

NO. A cleaning is **always** included on any repair. It's always included in the price that we quote to you. We consider it part of our Value Added Service.

*I've heard about PROTRAK'S Value Added Service. How does it work?*

...Stay Tuned for the next edition of Tanner Plus to find out the answer.
