

# 'Green' tips from Environment Canada

Here are a few ways to keep our water clean:

- Many furniture strippers and paint solvents can be harmful to the environment. Read the labels, look for alternatives and never pour them down the drain!

- Never dump pesticides, paints and solvents down the drain or storm sewer. These pollutants could end up in a nearby river and lake. Check with your municipality on proper disposal.

- Read the label! If what you're throwing away is hazardous, dispose of it properly. Just one drop of oil can contaminate up to

25 litres of water.

- There are many of good detergents that are low-

phosphate or phosphate-free. Phosphates get into lakes and rivers and cause

excessive growth of algae and weeds that could choke out fish.
