

The Regional Municipality of Halton

A Partnership That Works!

NOTICE OF COMMENCEMENT

Class Environmental Assessment Retirement of Tenth Line Well Facility Georgetown Water Supply System Town of Halton Hills, Region of Halton

The Regional Municipality of Halton has initiated a Class Environmental Assessment (EA) to retire the Tenth Line municipal water supply well facility. The Tenth Line well was taken out of service in May 1999, as it does not have sufficient capacity to operate as a municipal supply well. Halton Region intends to retire the process equipment and unused pumping station building. Halton Region will abandon the Tenth Line Well as required by the Ontario Ministry of the Environment (MOE) under Regulation 903 of the Ontario Water Resources Act.

A water facility that was subject to the Class EA process for its establishment is also subject to Class EA requirements for its retirement as described in the document entitled Municipal Class Environmental Assessment (Municipal Engineers Association, June 2000). The Class EA for the Tenth Line Well Facility Decommissioning will be conducted in accordance with Schedule B of the Municipal Class EA process.

Input from interested stakeholders is a key component of this project. Halton Region is interested in any comments that you may have concerning this project and will receive comments in writing until December 3, 2004. Subject to comments received from review agencies and the public, the decommissioning activities associated with the retirement of the Tenth Line well facility are anticipated to commence in the spring of 2005.

For additional information about the project, to provide comments or to be added to the project mailing list please contact:

NOTICE OF STUDY COMMENCEMENT

New Burnhamthorpe Road (Regional Road 27) Transportation Corridor and Potential Future Bridge Crossing of Sixteen Mile Creek, Town of Oakville Class Environmental Assessment Study

The Regional Municipality of Halton is initiating a Class Environmental Assessment for a new transportation corridor in the vicinity of Burnhamthorpe Road to satisfy east-west travel demands in the Town of Oakville (refer to map shown below). A wide range of road improvement alternatives will be examined as part of the study including roadway widening on the existing alignment, roadway construction on a new alignment, construction of a new structure across Sixteen Mile Creek, replacement/rehabilitation of existing watercourse crossings and intersection improvements.

This notice signals the commencement of the Class Environmental Assessment - a study which will define the problem, identify and evaluate alternative solutions, and determine a preferred solution in consultation with the Town of Oakville, regulatory agencies, and the public. The study is being conducted in compliance with Schedule C of the Municipal Class Environmental Assessment (June 2000), which is approved under the Ontario Environmental Assessment Act.

As part of the consultation process, the Region will establish a Stakeholder Group that will meet at key points in the process to provide input to the Project Team. Interested citizens should contact the Region (see contact information below) to obtain more details on the purpose and representation of the Stakeholder Group. Another key component of the study will be public consultation through two Public Information Centres (PICs). The PICs will provide members of the public with an opportunity to meet the Project Team, review the study scope and discuss issues related to the project including alternative solutions, environmental considerations, evaluation criteria and alternative designs. The first public meeting will be held in January 2005. Details regarding the forthcoming PICs will be advertised as the study progresses.
