'The Way of the Pilgrim'

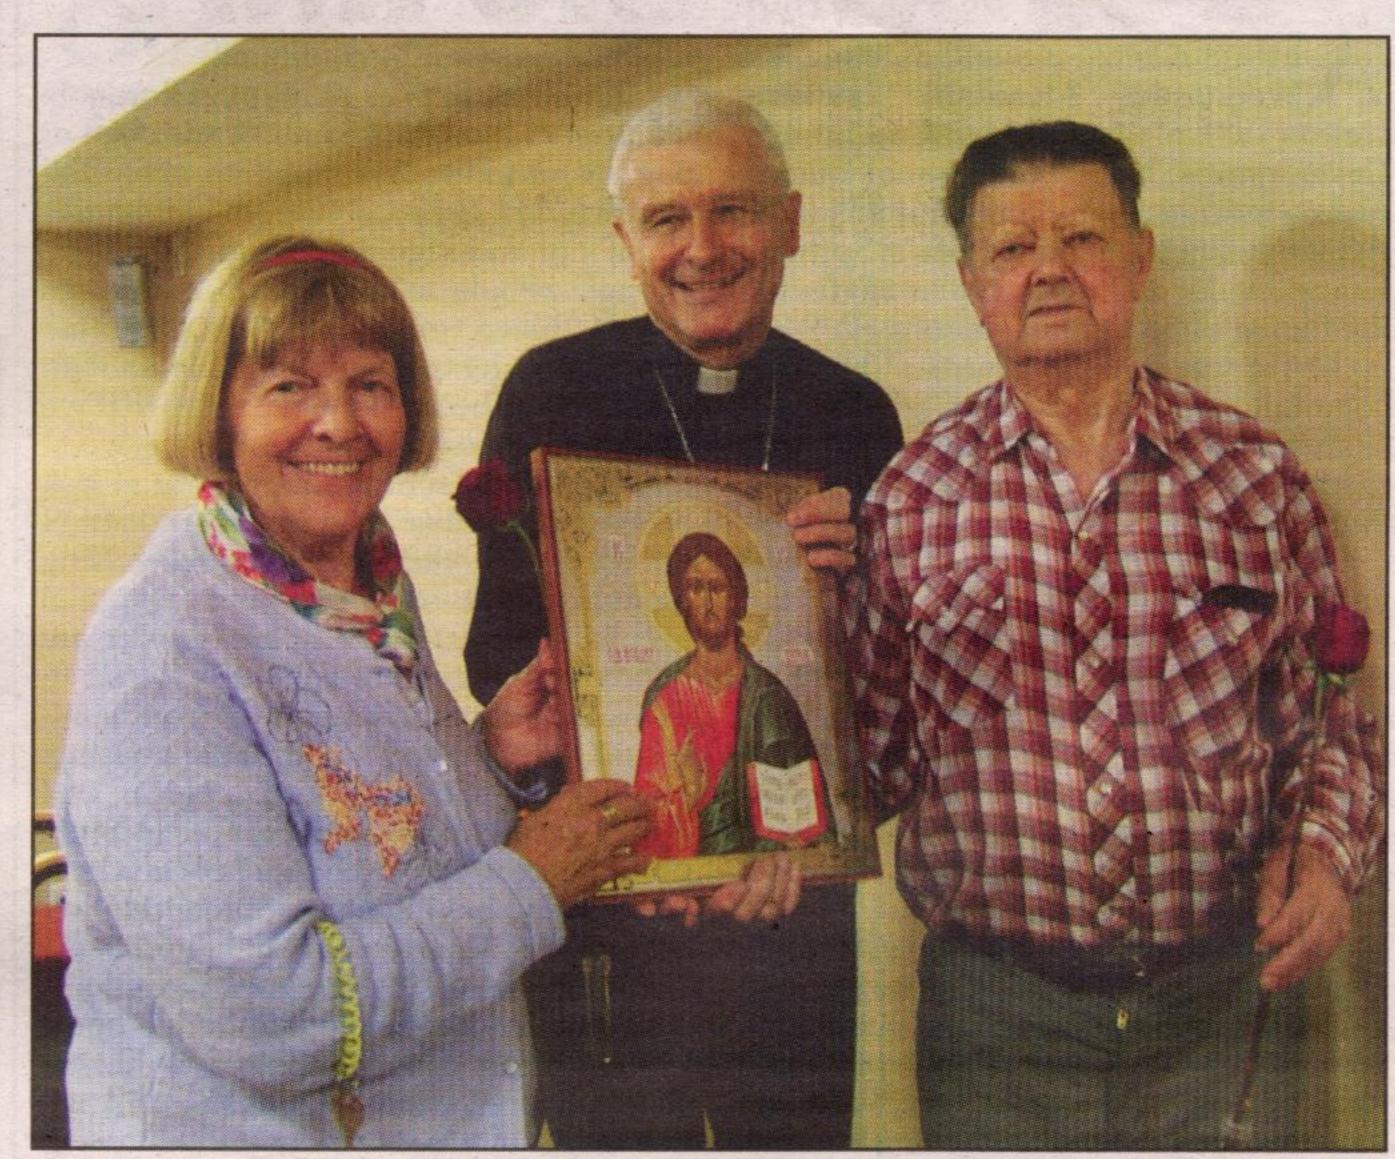

PHOTO BY JENNIFER ENRIGHT

Rev. Christopher Eriksson (holding an icon depicting Jesus) met with Agnes Remme and John Artem, two Mountainview Residents, who attended the first of a series of readings by Rev. Eriksson at the residence's chapel. Rev. Eriksson, who is the pastor of St. Panteleimon's Church, read from a Russian classic entitled The Way of a Pilgrim and he'll be holding readings from the work on the last Tuesday of every month. Readings are also planned for The Bennett Health Care Centre on the last Wednesday of each month. Rev. Eriksson says The Way of a Pilgrim is an uplifting and profound book that should resonate with residents. The work details the spiritual journey of a Russian peasant. For information about the readings, contact Rev. Eriksson at 905-702-7304. The email address is theartofhealthyliving@sympatico.ca.

GOOD CREDIT, BAD CREDIT. Come in and view our inventory! TOP DOLLAR FOR YOUR

Loaded w/moonroof & more!

16 ft. box, auto, air, etc.

2005 BUICK ALLURE Auto, AC, pw, pdl, & much more.

Loaded w/air, leather, pw, pdl, sunroof.

2001 PONTIAC MONTANA SE Loaded, auto, air, pw, pdl.

2002 FORD ESCAPE XLT Loaded, 40,000km.

2000 DODGE CARAVAN Auto, air, pw, pdl, 77,000 km.

The brake fluid in your car should be changed on a regular basis. Fluid is Hydroscopic (absorbs water). Water lowers the boiling point of the fluid which can lead to the fluid boiling causing brake failure. Water also causes damage the hydraulic components. Check your owner's manual.

HELP! Gas prices are going through the roof and I commute about 125kms daily. I drive a 2001 Caravan. Any ideas how I can save some gas?

Desperate and broke!

Some ways to lower the cost of driving. Use the A/C sparingly; avoid use of air conditioning in the morning when it's relatively cool. Unload the vehicle of the stuff you should really store somewhere else. Golf clubs, sports equipment... l saw a gal last week with Xmas gifts still in the trunk. If you're still driving around with a roof rack or luggage rack on the top remove them until they are needed. Slow down. On the hwy. just go with the flow.... it's more relaxing anyway.. Lastly; don't buy more gas than you need. Check your manual for the proper octane level for your car. Don't purchase super if a midrange will do. Ok just one more, Make sure the air cleaner is clean. A dirty filter will not only effect performance it wastes gasoline.

I have a Chevrolet S10 pick-up. I replaced brake lines front and rear, no leaks in system checked and rechecked lines, front and rear brake cylinders no leaks. When I pump my brakes after bleeding it bubbles in the rear reservoir and pedal is not stiff. Can you help?

Sounds as if the master cylinder has failed... These can be damaged by pushing too far down while bleeding the brake system. The rubber seals in the master pick dirt or become abraded in the pumping process. While bleeding check that the pressure differential switch has not fired this will usually trigger dash light... Bleed in sequence of the furthest brake first. Added note: I'm against unlicensed people servicing brake systems. Today's computerized ABS brake systems are complicated and require a high level of expertise notice I'm not even mentioning the specialized equipment required.
