Home IMPROVEMENTS

Do your repairs before winter hits

The coming of autumn is a signal to do simple outdoor repairs and maintenance. Winter and summer wear-and-tear creates rotting and irreparable damage to your

home and outdoor furniture.

Here are some easy repair tips for extending the life of your home and patio investments:

- A clean, dry surface -

free from oil, loose particles or rotten wood - is a must before starting any repairs.

- Fine-sand outdoor wood areas that need repair.

- Fill in cracks and holes in wood surfaces using a professional-quality wood filler before a top-coat paint or stain is applied.

- After applying wood filler, remove any excess with a putty knife or a damp cloth. Allow two to eight hours drying time before applying another coat, if necessary. Sand to a smooth surface and paint.

- If you plan to stain the wood filler, make sure you sand with coarse or medium sandpaper before staining. All stains react differently to wood grain, density and colour variations. So test the stain on a piece of scrapwood to match wood filler colour.

- To finish repairs, always top-coat the surface with an exterior-grade paint, stain or clear finish.

- Ask your local hardware dealer about professional-quality wood fillers that speed home repairs and help you to maintain your property and home investments.
