

Industrial accident at ABT

The Ministry of Labour is investigating how a Rockwood man's arm was caught in a rolling machine at the ABT/Louisiana Pacific plant on Main Street North on Saturday at 10:30 a.m.

Street man was charged with impaired driving after being pulled over by police for driv-

ing erratically on Mill Street East at 4 p.m. on Saturday.

Charles Warren, 48, was feeding vinyl siding through a machine when his hand and arm were caught and crushed by the rollers. Warren was taken to Milton Hospital where x-rays showed no bones were broken and he was treated and released. Warren was back at work on Monday doing light duty.

A Ministry of Labour spokesman said that 15 orders under the Occupational Health and Safety Act were issued to the company after the accident, mainly dealing with placing guards - physical barriers - on similar equipment.

Ford rammed

Approximately \$750 damage was done to the door of a Ford pickup truck in a fail-to-remain accident in the parking lot of the ABT plant last Tuesday between 11:50 a.m. and 12:15 p.m. The owner, a Kitchener man, told police while he was in the plant someone ran into his truck and left the scene.

SPRING, which is due next Tuesday on the calendar is slowly taking over from winter. Ice on Fairy Lake is dissolving as unseasonably warm weather took over last week. Residents were jolted back to reality Saturday night when about 12 cm of snow blew in and covered ground recently revealed. By Wednesday of this week most of it had disappeared as rain replaced snow. The probs say we'll have a sunny weekend to end March Break.

Meeting to explore ways of improving Fairy Lake

Interested Actonians are invited to meet at the Acton High School Cafeteria on Tuesday, March 28 at 7 p.m. to explore what can be done to improve the health and beauty of Fairy Lake.

Biologists from the Ministry of Natural Resources and the Credit Valley Conservation Authority will describe the situation and conditions of the lake and its watersheds and a representative of the Esquesing Historical Society will briefly review the lake's

history and importance to Acton.

Everyone is encouraged to come out, ask questions, express concerns and discuss the ways and means of returning our unique lake to a healthier, more natural and beautiful state.

Councillor Norm Elliott, who lives near the lake and relishes the natural life he sees from his deck believes that "ordinary citizens can move mountains - and save lakes - when we work to-

gether, and we're pretty cost-effective too."

Councillor Rick Bonnette sparked the formation of a Friends of Fairy Lake group by organizing a volunteer work crew last summer to help clean up the shoreline at the Rotary Park bridge area. Veterans from that effort are now spearheading the drive to create a more permanent support group.

IODE gets report on Founder's Day

By DOT NORTON

The March meeting of Lakeside IODE was held at Helen Otterbein's home.

Helen gave a report on the Founders Day Luncheon at the Guelph Cutten Club. This was a very special event aimed at celebrating the IODE's 100th anniversary. Guelph Mayor Joe Young attended the event. Singers from each decade were part of the entertainment.

Helen Otterbein read the oath for installation of officers for the year and presented the gavel to Regent Helen Jocque.

The chapter also received a thank you letter from the Women's Club for goodies sent to members at Christmas. They also received a thank you note from Joyce Grozier at Touch of Harmony.

Chapter members received good grooming bags to work on and wool is available for mittens and other items needed for the provincial bale.
