Total Cost	\$204.9 M	\$355.1 M

* Based on District Health Council projections.

WHAT ABOUT FUNDRAISING FOR THE NEW HOSPITAL AND EXPANSIONS?

Over the next 6-8 months, William Osler Health Centre will negotiate with the Ministry of Health for the services, the size, and funding for the new hospital. Once we have the final numbers for the new hospital and expansions, we'll let our communities know!

"The Board of Trade and its members are extremely excited about the prospect of a new hospital for Brampton. We look forward to working with the community to help raise the necessary funds to make the hospital a reality for us all!"

Stuart Johnston, General Manager — Brampton Board of Trade

HOW ARE THE PLANS DEVELOPED?

Physicians, hospital staff and volunteers use their experience and expertise to identify the services and space needed for the new hospital and the expansions of Etobicoke and Georgetown that would:

- Be patient and family focused.
- Provide a therapeutic environment.
- Be flexible to support growth, changes in practice, and new technologies.

"I'm delighted that after 20 years on the Chinguacousy Health Services Board this site was chosen for a second health care facility in Brampton. It's my fervent hope that with the City's Wellness Centre adjacent to the hospital, preventative health will become more of a priority..."

Peter Robertson, Mayor — City of Brampton

NEXT STEPS

- Receive direction from Minister of Health and Long-Term Care on the submitted proposal for a new hospital in Brampton.
- Begin construction planning for Brampton.
- Work jointly with the City of Brampton and community leaders to determine the long term use of the existing Brampton hospital site.
- Submit plans for expansions to Etobicoke and Georgetown Hospital Campuses.
- Keep our communities updated.

EXPANDING ETOBICOKE AND GEORGETOWN HOSPITAL CAMPUSES

Both Etobicoke and Georgetown campuses require expansion and renovations to accommodate the increased number of patients, new technologies, changes in health care delivery and to support a multi-team approach to care.

The planning for Etobicoke and Georgetown Hospital Campus expansions is underway and is expected to be complete by January 2001. Watch for highlights of the Etobicoke and Georgetown plans early in 2001.
