THE Electrolysis CLINIC

SPECIALISTS IN PERMANENT HAIR REMOVAL

112 Main St. S., Ste. 208
Georgetown, Ont. L7G 3E4

Electrolysis was invented over 100 years ago and remains today as the only permanent method to remove unwanted facial and body hair. This is achieved by inserting a tiny probe into the hair follicle. A combination of heat from the probe and moisture in the hair follicle severs the blood vessels from the papilla eliminating the possibility of nourishment. The hair is then removed harmlessly with a forcep.

At the clinic only disposable needles & gloves are used. Our sterilizing equipment is tested on a monthly basis & certified by an independent laboratory.
