

## Three object to Acton donut shop plan

A proposed donut shop, gas bar and kiosk planned for rural land south of Acton wasn't well received at a public meeting earlier this month. Three people spoke against the proposal by John and Anne Moroz, and no one spoke in favor.

The Morozs want the zoning changed on their property on the northwest corner of Hwy. 25 and 25 Sideroad. The land is currently zoned agricultural, and they want it changed to agricultural special in order to accommodate their proposal. John Ariens, the planner representing the Morozs, said petroleum companies and donut chains which were approached have shown interest in the location.

The proposal would include a 45-seat coffee and donut shop with parking for 26 cars on Hwy. 25 which would be intended to serve travellers. A gas bar and convenience kiosk would also be on

the site.

Don Payne, the neighbor just north of the site, gave a presentation to council urging them strongly to reject the proposal.

"Acton has two donut shops, seven restaurants and four places offering coffee service... I don't think Acton needs another coffee donut shop. We're loaded with coffee," Payne said.

He also pointed out there are two gas stations in Acton, two more east of Acton, two south of Acton and four abandoned stations in the area, including the one in Speyside. Other concerns were raised about increased traffic, and the environmental impact, including the effect of a gas bar on ground water in the area.

Council won't make a decision until after town staff have submitted a report and recommendation on the proposal. It will be discussed by councillors at that time.

Please note: we cannot take community notices over the phone. We accept only faxed or written notices. We cannot guarantee that a notice will get in the newspaper. Please keep notices brief — we reserve the right to edit the notice for space. All notices, must be accompanied by name and telephone number.

## THE BETHANY HILLS SCHOOL

*Latiore Fines Petimus We seek wider horizons.*

This unique educational facility is situated in the heart of the beautiful Bethany hills, 100 kilometres north-east of Toronto near Peterborough. An alternative education of the highest quality is provided in this country setting, a home away from home where the needs of each girl can be met and where nature is an everyday reminder of our rich Canadian heritage.

At Bethany there is a sincere commitment to provide every opportunity for young women to grow in their knowledge and to expand their learning experiences. The Bethany Hills School is an ideal environment for girls to develop intellectually, physically, socially and emotionally and for each student to prepare herself for higher education at the university or college level.

With its strong academic programme, its unique sports opportunities, and its small town, large family atmosphere, The Bethany Hills School can truly allow its students to seek wider horizons.

For more information regarding this unique educational facility contact:

### DENTAL MATERIALS

Charles Goodyear invented a denture base material back in the mid 1800's. This material was called "Vulcanite". Vulcanite is a dark brown, semi-rigid rubber. Since then, denture base materials have come a long way, and vast changes and improvements have been made. Today very modern plastics and acrylics are used.

The artificial teeth on a denture were made from such materials as bone and ivory. Precious metals such as gold and silver were also tried. Even wood was used to make teeth!

Finally, porcelain and plastic teeth have replaced the former materials. We've come a long way since the days of "wooden teeth". Denture technology has been vastly improved for denture wearers, and they are continually discovering new techniques and materials.

Today, more than 5 million Canadian adults are wearing dentures. That's more than one out of every four people in Canada.
