**THE Electrolysis
CLINIC**

SPECIALISTS IN PERMANENT HAIR REMOVAL
112 Main St. S., Ste. 208
Georgetown, Ont. L7G 3E4

Why Choose Electrolysis?
Because electrolysis is the ONLY PERMANENT method of hair removal. This is achieved by inserting a tiny probe into the hair follicle. A combination of heat from the probe & moisture in the hair follicle severs the blood vessels from the papilla eliminating the possibility of nourishment. The hair is then removed harmlessly with a forcep.

Is Electrolysis Safe?
Yes, it is very safe and unlike depilatories or bleaches, no harsh chemicals are used. We follow very strict sterilization procedures and only disposable needles and gloves are used.
