by ALEX TRENTON DENTURIST

**DENTURISTS**

Denturists (or denture therapists) have been licensed dental professionals for over 20 years. Although it is considered a fairly new field, currently there are over 400 practicing denturists in Ontario alone.

Denturists know dentures, they study denturism and general health for a full 3 years; more than any other oral health care practitioner, they specialize creating full and partial dentures, that not only fit and function well, but look attractive. They also repair, relin and adjust all types of dentures.

We make everything from start to finish in our own lab located right on the premises. This offers patients not only convenience and quality, but also reduces costs as there is no middle man, so not only do you get personalized service, you get it at a reasonable price. You do not need a referral; simply call our office direct.
