ALEX
TRENTON
DENTURIST

PARTIAL DENTURES

A partial denture is a removable dental prosthesis that replaces one or more missing teeth. It often has a metal framework, with metal clasps and wires that go around your natural teeth. To hold it in place the teeth that you are missing are added to the framework and the partial denture fits securely around the natural teeth, if you need a tooth extracted after your partial denture has been made, we can simply add a tooth onto the framework you do not need a referral from your dentist.

Simple call our office, for a free, no obligation consultation.
