Fire Prevention Week

The theme for Fire Prevention Week, Oct. 8 to 14, 1995 is Watch What You Heat: Prevent Home Fires.

The week increases public awareness of the dangers of fire and the ways we can protect ourselves from fire.

Fire prevention-officers from the Halton Hills Fire Department will be on hand at Georgetown Marketplace Oct. 10 to 14, giving people the information they need to take fire prevention into their own homes.

They will be offering 15 minute

seminars at 11 a.m., 2 p.m., 5 p.m. and 8 p.m. on the hazards of home heating, cooking and general fire safety.

Many people take heat sources, like stoves, dryers, and appliances, for granted. The fire service hopes that people will be reminded that these heat sources present a fire hazard and will take preventive actions to avoid fires.

They will be happy to answer your questions and will provide information on fire prevention.

Severe damage
An Arthur resident was leaving a Sixth Line driveway Monday afternoon when he lost control of his 1984 Ford on the poor road and struck a tree. The car sustained severe damage and the driver was not charged.

Struck pole
A young Georgetown driver was heading south on Ninth Line Sunday morning when he lost control and struck a hydro pole. The 1986 Ford was totalled in the accident, but no charges were laid due to the inexperience of the driver and a poor road surface, police said.

... Lend Me Your Ears

By Cory Soal
R.H.A.D.
"HOW LONG DOES IT TAKE TO ADJUST TO A HEARING AID?"
With improved technology, hearing aids have become very sophisticated. Combined with the specialized experience your hearing instrument practitioner has acquired in hearing aid dispensing, most people find adjustment is a progressive experience. Within the 30 day trial period, you should be wearing your hearing aids most of the time and be aware of the benefits you are receiving from them.
For more information about the trial and adjustment period, call Cory at...
