**TOWN OF HALTON HILLS**  
**PUBLIC NOTICE**

**MAIN STREET NORTH (GEORGETOWN)  
TRAFFIC OPERATIONS STUDY  
PUBLIC INFORMATION SESSION**

The Corporation of the Town of Halton Hills has initiated a Traffic Operations Study of the section of Main Street North (Highway 7) between the CN overpass (White Bridge) and Ontario Street in Georgetown as shown in the key plan below.

The Town of Halton Hills has been receiving public complaints and petitions in reference to the traffic operation, light speed traffic, pedestrian safety, and vehicular/pedestrian conflicts on Main Street North. The Main Street North Traffic Operations Study is being undertaken to establish improvement strategies that will mitigate community concerns relating to these issues.

To ensure that the Study goals and objectives are achieved, a fundamental component of the Study will be to actively involve the public throughout the planning and design stages. In consideration of this, a Public Participation Program has been established to "scope out" the specific concerns of local residents and stakeholder groups within the Main Street North area to ensure that their interests and objectives are addressed in a meaningful and responsive fashion.

The initial phase of the Public Participation Program will be to conduct a public information session to discuss the Main Street North Study and provide the public and stakeholder groups an opportunity to comment, identify issues and provide additional information. The Public Information Session will be held on:

**Wed., Oct. 18, '95**  
**Joseph Gibbons Public School**  
**41 Moore Park Crescent**  
**Georgetown, Ontario**  
**7:00 p.m. to 8:30 p.m.**

If you can not attend the information centre and would like to comment or require additional information please contact either of the following individuals.
