The local Post Office delivers

Dear editor:
While most Ontarians delighted in the LCBO being open on Sunday, Dec. 24, an equally progressive and service-oriented milestone was quietly achieved by Canada Post.

On the morning of Sunday, Dec. 24, we received a phone call from the postal outlet at Delrex Variety. Our annual Christmas package from my brother's family in Calgary had not arrived

by Friday, Dec. 22 so I simply assumed it had been sent to my parents. Rather, it had made its way through "the system," but with no business days remaining before Christmas during which to send out the standard parcel notification. Could we pick it up? You bet!

Thank you to the staff of Delrex Variety, who by looking up our phone number and placing a quick call, demonstrated postal service beyond any

Canadian's wildest dreams, and averted a minor Christmas disaster for four generations of my family.

ADAPTING AND ENJOYING

You will want to wear your hearing aids to hear clearly and easily. Wearing hearing aids on a daily basis is the easiest way for you to become comfortable with them. Generally, the more you do wear them, the more natural they become. Sometimes a small adjustment is all it will take to get that hearing aid out of the dresser drawer and back in your ear!

Hearing aids will not return your hearing to normal, nor will they cure a hearing problem. They are an aid to help you hear better, and with proper care, patience and cooperation will enable you to enjoy the beautiful sounds of life.

Tooth Chatter by ALEX TRENTON DENTURIST

IMMEDIATE DENTURES

An "Immediate Denture" is a denture that is inserted immediately following the extraction of the natural teeth.

Using this method, the denture actually acts a sort of bandage to help the tissues heal. The denture must be left in place during the first 24 hours. You must follow normal post extraction recommendations, from your doctor and them come in for an adjustment/check-up appointment the following day. Another advantage, is that the patient gets their denture right away and doesn't have the inconvenience or embarrassment of having to go without teeth. Immediate dentures are very popular, however this route is not ideal for everyone. It often involves an extensive period of adjustment in which the patient and Denturist must work closely together for some time for best results.

If you have never worn dentures, your new teeth will probably feel strange and bulky in your mouth. This is because the muscles of your face, lip, cheeks, and tongue are used to your former teeth, or to nothing at all. These muscles are being stretched and molded to new contours and dimensions. This muscle tension will subside in a short period of time. Also, learning to chew properly with new dentures may take two to six weeks.

It is also important that the person who extracts your teeth, does not have to be the person who makes your dentures. Denturists are "denture specialists" who work together with other dental professionals, to make sure you get the best denture care available.

You do not need a referral; simply call our office direct.
