**KEEPING DENTURES CLEAN**

Cleanliness is the key to comfort. Only a clean denture is a comfortable denture. Just as natural teeth must be brushed regularly, so should your denture. It takes only a few minutes. The denture brush, designed specifically for this purpose, is available at our office, free of charge.

When cleaning your denture, fill the basin with warm water to prevent breakage if the denture should slip from your hands. Hold the denture just teeth. Never use hot water or gritty powders. Rinse the denture thoroughly and replace it carefully.

If your mouth has a tendency to form tarter deposits, it is important to remove the tarter from the denture regularly. At least once a week, place your denture in a cleanser overnight. This will soften the tarter deposits so they can be removed easily with a brush. Your denture will have no odor as long as it is clean.

If you have any questions regarding your dentures, give our office a call.

You do not need a referral. Simply call our office direct.
