## ... Lend Me Your Ears

### SUMMERS FINALLY ARRIVED

and with it comes anticipation of soaking up the sun at your favorite beach or by poolside. For those of you who have middle ear drainage tubes in your eardrums because of a middle ear infection, or just have sensitive ears, or know how harmful even a minute amount of pool or lake water can be to your ears.

"Floatable" custom molded earplugs, individually designed to give your ear an airtight fit so you can enjoy your summer to the fullest.

No references needed. Simply call our office for a free consultation.

## The Problem is Hard Water and LIMESCALE

### THE PROBLEMS

- Blocked pipes & showers
- Dry skin & lank hair
- Ruined water Heaters
- Excessive fuel bills
- Expensive plumbing bills

Now all the above problems can be cured if you install a Water King.

Hard water costs you a fortune by depositing scale in pipes and appliances. It is unsightly in baths, sinks and toilets and is difficult to clean. But it's the limescale you cannot see that really costs you money in increased fuel costs and repair bills. The Water King is the modern alternative to a water softener, it's easy to install - with no plumbing, no salts and no maintenance required. **It is absolutely guaranteed to work or your money back.** The cost to run it is around \$10.00 per year. Send for a catalogue and your FREE water hardness tester kit today.

## On the Tee

### Custom Fitting

It is always nice to have sports equipment that really fits you and suits your particular way of playing the game. Many golfers would like to have clubs that not only feel comfortable but which also have the design features that help them play better golf. This combination is not always easy to find. For those still searching, custom-fit clubs may be the answer. Clubs sold by the major manufacturers may be of excellent quality but they are designed for the mass market. The principal benefit of custom fitting is that you can get clubs that are built to your specifications. Even when you know exactly what you want in terms of clubhead style (cavity back or blade, over-size or standard size), weight, balance, length, loft, lie, grip size, and shaft characteristics, you may not be able to find clubs which fit all (or at least most) of your requirements. It is even difficult to determine what the specs of clubs in shops really are.

The other approach is to have clubs custom-fit and custom-built for you according to your specifications. Your needs are assessed and each component (clubhead, shaft, and grip) is selected just for you before the clubs are assembled. If you play on the PGA Tour or if you have a lot of money to spend, you can get a major manufacturer to build a set for you. If not, you can visit an independent clubmaker who will help you to identify your specifications and build the clubs to fit. Because they have lower overhead expenses, independent clubmakers generally can provide you with excellent clubs built from top-line components at a very reasonable price.
