WHEN EXERCISE IS NOT ENOUGH!

Body sculpting by liposuction is literally a dream come true.

Localized accumulations of fat, which may be inherited and sometimes impossible to eliminate by exercise or dieting, can now be removed permanently by liposuction, never to plague you again.

The concept of liposuction is surprisingly simple. It is a technique that improves the body's contour by removing excess fat from fatty deposits located between the muscle and the skin. Fat cells that are removed by liposuction never grow back.

In women, the most frequently treated areas are the abdomen, hips, knees, calves, chin and neck.

In men, the most commonly treated areas include the love handles, abdomen, breasts, chin and neck.
