

### For a good cause

Mold-Masters Limited's employees have again shown their Christmas spirit with a huge contribution to the Georgetown Bread Basket. More than 2,700 pounds of food was donated by the employees. They also donated "barely used" and new items to a silent auction from which the \$1,000 raised went to purchasing non-perishable food items. Pictured with some of the Mold-Masters employees are Mayor Marilyn Serjeantson (centre left) and Jonathon Fischer, executive vice-president. In addition to the food drive, Mold-Masters' Adopt-A-Family program (a separate charitable drive) was the recipient of more than \$1,400 raised through the efforts of raffles and "dress down Fridays." Gifts of food, toys and clothing were donated to a number of local families and organizations.

## Halton Hills gets two of Halton's nine new cops

Two of Halton's nine new police officers will be patrolling the streets of Halton Hills.

After being sworn in Constable Sean Hann and Constable Roger Wilkie will assume uniform patrol duties in town with the Halton Regional Police Service.

Hann began working with Halton Regional Police in August, previously he worked as a court officer in Metro. Prior to that he was a constable with York Regional Police Service. Hann lives in Whitby.

Wilkie, a Burlington resident for

the past seven years, has worked as a residential counselor in a group home for developmentally challenged adults and as a volunteer with the Halton Regional Police Victim Services Unit.

Wilkie studied psychology and criminology at Brock University in St. Catherines.

Three of Halton's new officers are experienced police officers. The other six are new recruits who recently graduated from the Ontario Police College in Aylmer, Ontario.

The nine officers were welcomed in a ceremony at the Halton Regional Centre last week.

**HOW DOES LOUD NOISE CREATE HYPERTENSION?**  
It appears to affect the nervous system, signalling the peripheral blood vessels to constrict as though under attack. This triggers a surge of adrenaline and other fight-or-flight chemicals into the bloodstream - a response that carries with it the potential for glandular or cardiovascular changes, in other words, unwanted noise creates the same final results as increased stress (try to avoid it)!
