## New cedar siding offers color, looks and a warranty

**Continued from pg. 9**  
 The factory finishing results in evenly applied finish and the color never varies. There are other advantages also. Since the cedar used is kiln dried in a factory, it does not shrink after installation. Also, finishing siding on site using either a brush or spray can result in contaminating the environment.

Now comes the good news! The warranty! MacMillan Bloedel's "Classic Coat Prefinished Cedar Siding System" is warranted for 30 years against structural defects and for 15 years against coating defects. The warranty on the coating can be extended for up to another 15 years if the product is refinished with a qualified

Olympic finish before the first 15 year period is up for a total of up to 30 years on the wood and the finish. If you sell the home the warranty is also transferrable to the new owner. All you have to do is re-register the new owner's name with the manufacturer.

Classic Coat wood siding can be easily installed in the winter, providing the home with an instant finished product that will begin protecting your home immediately. No need to wait for summer to have wood siding installed on a new home or an existing home.

More information can be obtained from building supply dealers.
