Time to get your eyes serviced

*After 40, it gets harder to see up close.  
It's a natural condition called presbyopia. Regular visits to  
the eye doctor can keep things in focus.*

TRENTON  
DENTURIST**

**QUESTIONS & ANSWERS**

**Q:** I believe that I require new dentures but I'm concerned how my appearance will be changed?

**A:** At the Denture Clinic we always go through a "Wax Try-In" stage.

The selected teeth are set up in a wax base and fitted in your mouth. You then have the opportunity to see, in a mirror, exactly how the denture will appear, before it is completed.

As the teeth are only in wax at this stage, we have the liberty to move the teeth about, or even change the particular tooth selection. We never go beyond this step until we have accomplished exactly the natural, pleasing appearance you desire.

**Q:** What is a permanent processed reline?

**A:** A processed reline is a way of re-basing your denture from the same type of long care acrylic from which it was originally made. This will make the denture fit more snugly to your ridge.

**Q:** Will it change the appearance of my teeth?

**A:** No, it only re-fits the denture to your ridge, no change of tooth position takes place.

**Q:** What are soft, or cushion relines?

**A:** A permanent soft rubber lining is applied to the lower denture inside ridge. Soft, or cushion relines are excellent alternatives for those who have sensitive oral tissue and tend to get frequent sore spots. A properly applied soft lining can provide years of comfortable chewing and smiling.

You do not need a referral; simply call our office.

**THE ULTIMATE IMMUNE  
BOOSTER**

So often we hear people say, "I'm looking for that herb my friend uses to help her fight off colds." Sometimes they can't remember the name, or don't know how to pronounce it - but we know what they mean right away. In the last 50 years, echinacea has achieved world recognition for its ability to enhance the body's natural defenses by nourishing the immune system. It helps the body fight off viral, bacterial and fungal infections, as well as building resistance to colds and flu.

A native plant of Canada and the northern United States, you may even find echinacea (purple cone flower) growing in your own backyard.
