DENTURE CLINIC

PROBLEM LOWER DENTURES?

NEW MYOLOC "WINGS" KEEPS LOWER DENTURES FIRMLY IN PLACE!

Does your lower denture move from side to side? Do you have difficulty in speaking, or in eating even the softest foods? Do you have a flat lower ridge? Now we can make those bothersome lower dentures fit more firmly than ever before, with the Myoloc "wing system". Once attached to your denture, these wings give you the stability you've been hoping for. And it's completely invisible in the mouth. They can be inserted in new or in your existing dentures, in just a few hours, for the same cost as a reline. Imagine, dentures that allow you to speak, smile, eat and laugh with confidence!

Myoloc "Wings"
